

# MICHELIN PILOT SPORT A MW1

**ASPHALT RALLY**

WEATHER

**GRIP FOR WET AND DRYING ROADS**

### FOR WET AND DRYING CONDITIONS

Specially designed for driving on rainy and drying roads. The MICHELIN Pilot Sport A MW1 has a groove rate <sup>(1)</sup> that is twice as high as the MICHELIN Pilot Sport R P01, giving it excellent water evacuation. The transverse grooves also allow it to find traction in the event of a change in grip (polluted roads, mud, gravel, etc.).

### WARM UP

The MICHELIN Pilot Sport A MW1's «lightning-fast» tread pattern, which heats up the rubber and the carcass, ensures that the MICHELIN Pilot Sport A MW1 can be brought up to speed quickly.

### PRECISE AND IMMEDIATE FEEDBACK

Thanks to its reinforced carcass, the MICHELIN Pilot Sport A MW1 guarantees very good lateral and braking support. The tyre reacts quickly to driving instructions.

(1) Volume of open grooves

**AVAILABLE IN 16", 17" AND 18"**
